Profile

Senior Web Engineer with 10+ years of experience in web development, architecture, programming, layout, and system administration. Particular experience in working with business teams to distill direction and creative concepts into workable applications and products.

Experience

Career Highlights

- Founding member of niche social networking platform for veterans/military. Co-author/developer of provisional patent submission re: KeyPoints system
- Created real-time system visualization interfaces for tracking performance of renewable energy systems
- Developed and maintained back end of enterprise financial management/banking systems, healthcare systems/data and customer management
- Worked on team to implement applications/public-facing content for "big 10" pharmaceutical companies including Merck, Abbott, and Sanofi-Pasteur.

Senior Development Architect/Engineer, ArmedZilla Inc.

Phoenix, AZ — 04/2011-05/2012

- Engineer in charge of codebase development, both on the front and back-end.
- Lead developer in charge of KeyPoints product to visualize and share military experiences within a timeline format within a social context.
- Main point of contact for System Administration and operations related tasks including server maintenance and software installation (both server-side and client-side).
- Graphics and design implementation lead responsible for main implementation of UI/UX.
- Support the Chief Engineer and assume his responsibilities when needed, i.e., code deployments.
- Continually manage and tackle bugs and issues with the development team (ex. JS quirks, server library incompatibilities/version bugs, server open-file-descriptor errors).

Principal, WorkWise Hosting, LLC.

Lancaster, PA — 04/2009-10/2010

- Managing Member of boutique, "white-glove" hosting company serving businesses with large technical requirements but not the large, in-house staffing to support them.
- Served as adjunct IT department to businesses worldwide providing on/off-site and co-located web hosting, mail, CRM, and custom development solutions.

Web Developer/Production Consultant, Vigor Graphic Design, LLC.

Harrisburg, PA— 01/2006-04/2009

- Translated branding concepts and designs into full-featured web sites and applications, focusing on the restaurant industry.
- Managed internal and external networks and servers for Vigor, as well as client deployments for web projects.

Network Administrator, Payment Technologies, Inc.

Mechanicsburg, PA — 2002-2005

- Maintained Linux and Solaris internal company network, disaster recovery environment, and Linux-Windows hybrid connectivity for developers.
- Created and maintained interface for receiving and pre-processing external credit card and loyalty data from merchants, both from modern computer systems and legacy mainframes.

Web Developer, Pipeline Interactive

Lebanon, PA — 2000-2001

- Translated designs into production websites for large clients like Casio, Hershey Foods, and others using ColdFusion, ASP, and PHP.
- Implemented novel server-side technologies, such as on-demand image generation, using OpenSource software on a Windows server environment.

Lead Web Developer, Millersville University

Millersville, PA — 1999-2000

- Managed a team of students to create websites and projects for academic departments, including the deployment of PHP in the organization.
